How to Make a doctor's bag:

1. Place the brown rectangular “doctor’s bag” so the fold is down.
2. Add one handle to each top edge of the “bag” so they’re lined up together.
3. Add a red cross to the bag.
4. Add a label to the bag that says “doc.”
5. Make a thermometer using the red and black markers. (See sample.)
6. Add the band-aid and thermometer to the doctor’s bag.
7. The kids can add more items to their bags at home.
